- Multiplayer game developed using Unity Relay, Netcode for GameObjects technologies.
- Network synchronization, client-server communication.

CseppSite - Pastry Shop Website & Automation

- Static website for a local business, built with HTML5, CSS, and JavaScript.
- Custom PowerShell-based mini-program for updating product data.

Movie Search Engine (React / Vite)

- Dynamic website that handles and displays data from external APIs.
- Responsive UI, asynchronous data retrieval.

SUMMARY

Junior software developer with a BSc in Computer Science, strong commitment to the .NET ecosystem and various web technologies. My skills are mainly developed through small projects and a long-term, production-ready full-stack application. My main goal is to move out of my comfort zone and join a team where I can work on projects that help me reach a higher level as a developer.

LANGUAGES

- (C1) English - Written
- (B2) English - Complex

SOFT SKILLS

- Easy to adapt
- Self-aware
- Good communication skills
